(一)

Hiding behind the rock, Rin and Leila watched a large white truck was dumping green oil into the low-lying land. Rin noticed the word *Gotcha* on the truck and took some pictures with her phone secretly. Proof in hand! Rin was very excited until Leila told her *Gotcha* was the company where her father works as a manager. Suddenly, an uncomfortable silence fell between them.

Rin tried to ask Leila about her dad several times the next week, but the subject was quickly changed. One morning, Rin woke up early to drive to the hill and found more green oil was dumped there. When she got to school, she pulled Leila aside. "Leila, the leak is still there."

"I spoke to my dad. He is working on it, but..." Leila said.

"If there is an investigation, a lot of good workers could get in serious trouble. Not just him."

"I'm asking you, as a friend, to give him some time, Please!" she begged. "I would do the same for you."

However, strange images flashed in her mind—green oil, polluted fields and plants, sick people. Rin felt some power was driving her to make a choice. She took out of her phone which felt as heavy as a large stone in her hand and called the police.

Leila was absent from the school for several weeks. Rin was really worried about her friend but more worried about losing her best friend. Rin went to the street corner near Leila's house every day. She wanted to say sorry to Leila but was afraid of facing Leila and her family.

Leila watched Rin walk around her house every day. She knew Rin did the right thing but it really hurt her. One day, Mom handed her a piece of paper. Leila opened it.

Leila,

Don't feel sad for me, my dear. I feel greatly relieved to pay the price for what I have done. Without Rin, everything will be worse. Sorry!

Dad

Leila's eyes clouded with tears as she read. Slowly, Leila walked downstairs and came to Rin.

1. According to the passage, the green oil might be a kind of oil that's _____.
A. dug from low-lying land B. stolen by the white truck
C. invented by Leila's father D. bad for the environment
 2. The pictures taken by Rin were probably _____.
A. canceled immediately B. sent to the police
C. given to Leila's father D. taken away by Leila
 3. What were Rin's feelings towards Leila ?
A. Angry but worried. B. Hurt and angry.
C. Ashamed but afraid. D. Worried and sorry.
 4. Would Leila and Rin be best friends again? Why (not)?(请用约 40 词回答)
-

Last month I went to *Peru* with my mom and dad. My mom's company sent her there on business. It was great! We flew into *Cusco*. One weekend we took a train to visit *Machu Picchu*.

What is *Machu Picchu*? Well, it is the remains of an ancient Inca city. It is on top of a mountain that overlooks the *Urubamba River*. It is more than 7,000 feet above sea level!

How did we get up that high? We could have hiked the Inca Trail(印加古道) for four days. Instead, we decided to ride the train. It runs right along the river. It takes only a few hours. Our guide was a man from the local area. Not only did he provide information about the area, he also worked as our interpreter. Some of the people of *Peru* speak Quechua, which of course we don't understand.

As we rode the train, our guide pointed out unknown plants that grow in the rain forest. The plants which grow near the floor of the rain forest, was so thick that I could hardly imagine trying to get through it back in 1911. That was when Hiram Bingham, the man who searched for the city, started his expedition(探险). We also learned about the animals. There are some dangerous snakes that live there. One bite can kill a person. It must have been quite a journey that Bingham took!

His trip was well worth it, in my opinion. *Machu Picchu* was so big and beautiful! The stones have gone through the test of time. They have been there since the 1400s. There were terraces(梯田) cut into the sides of the mountain, and green was everywhere. To top it all off, we were in the clouds!

We saw where the people lived, where they worshipped, and where they farmed. The history is fascinating!

1. How did the writer go to *Machu Picchu* with her parents?
A. By plane. B. By boat. C. On foot. D. By train.
2. What does the underlined word "interpreter" in Paragraph 3 mean?
A. Translator. B. Driver. C. Guard. D. Teacher.
3. In which order did the writer do in her journey?
a. Arrived in *Cusco*
b. Get up to *Machu Picchu*
c. Learned about animals.
d. Get to know some plants.
A. a-b-c-d B. a-d-c-b C. b-c-d-a D. b-d-a-c
4. In the 4th paragraph Hiram Bingham is mentioned mainly to show _____.
A. how crazy he was to start the expedition in the rain forest
B. how difficult and dangerous it is to go through the rain forest
C. how knowledgeable the writer is to know about Hiram Bingham
D. how worth it was for Hiram Bingham to take the trip

Recent climate change reports have painted a shocking picture of the earth's future, but a tiny school of just 400 students decided to change the situation.

In 2021, Huonville High School in Tasmania, Australia beat other competitors from around the world and won the Zayed Future Energy Prize. The school used the \$133,000 prize to completely change an old building, turning it into the Zayed Future Energy Center, where students can learn how to use clean, renewable energy sources just like sunshine in everyday life.

The new building is equipped(配备) with solar panels, special windows and other high-tech things. Now, there are also some bikes available. Student volunteers ride these bikes to produce electricity that can be used to boil oil and make small fried cakes as a sweet reward for their own efforts. So far, the students' efforts at the center have saved their school more than \$44,000 on its bills.

Teacher and program director Nel Smit says the center has become an important place for students while drawing attention to a topic many people choose to ignore. "The center is a meeting place for students. but it's also a place where we hold demonstration(示范) events for the whole community?" she explains, "It has raised their awareness. They try to use clean and renewable energy in their life."

"Being part of the center has surely helped me feel like I'm doing something. I'm making a change, and my life is more and more eco-friendly," says the student Aisha Fisher. "Running away from climate change as a young person doesn't help." Aisha says. "The best thing you can do is to look at it from a positive, realistic opinion, and see what you can do by yourself."

1. What can students learn to do at the center?
 - A. Develop necessary living skills.
 - B. Prepare for worldwide competitions.
 - C. Use clean energy in their daily life.
 - D. Put on shows about climate change.
2. What is Aisha's suggestion for young people?
 - A. Develop your team spirit.
 - B. Make yourself rich in knowledge.
 - C. Face up to problems and do your part.
 - D. Throw away your worries while studying.
3. What is this passage mainly about?
 - A. Some useful methods of dealing with climate change.
 - B. Students in Huonville High School won a \$133,000 prize.
 - C. People all over the world work together to face climate change.
 - D. Huonville High School used its prize to build an eco-friendly center.
4. What's the structure of this passage?
 - A. ①②/③/④⑤
 - B. ①/②③/④⑤
 - C. ①/②③④/⑤
 - D. ①/②/③④⑤
