Do you know how to throw trash(垃圾) into the right bins? Look! There are different kinds(种类) of bins.

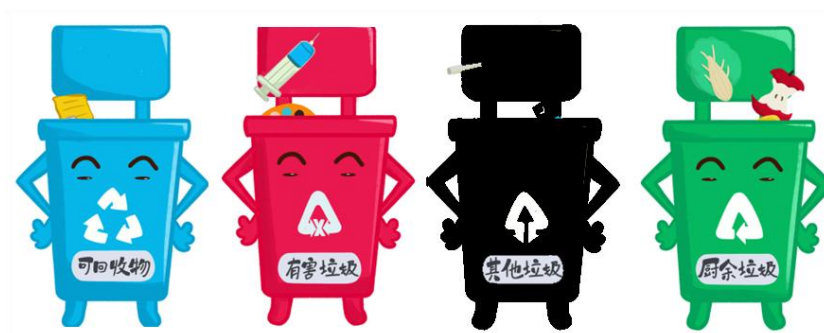

We should put the leftovers into the green bins, such as leftover fish, rice and vegetables. They're for the "Kitchen waste".

We should put old newspapers(报纸), glass and cans into the blue bins. They're for the "Recyclable waste".

We should put used batteries(电池) and expired medicine into the red bins. They're for the "Harmful waste".

How about other trash? We can put it into the black bins. They're for the "Other waste", such as dust, toilet paper(卫生纸) and so on.

Waste sorting is very important(重要的) in our life. Let's do it! And let's ask our family and friends to do it together!
