It's necessary to share your feelings with your friends, because sharing your feelings helps you to get closer to people you care about and who care about you.

In fact, adults are more private(注重隐私的) than people of other ages. That means adults will feel shy about sharing their feelings with others. While kids like to tell friends about how they feel every day.

Sometimes it can be really hard not to tell anyone that you're feeling sad, worried, or upset. **Don't keep feelings inside.** If so, it can even make you feel worse! But if you talk with someone who cares about you, you will not be all alone with your problems or worries. It doesn't mean your problems and worries go off, but at least someone else knows what your trouble is and can

help you find ways to do with it.

If your friends don't understand what you mean right away, try to say it in a different way or give an example that has something to do with you. Of course, there are many ways for you to speak up your feelings. If you think you'll have trouble saying what's on your mind, you can always write it down.

23. What does the underlined sentence tell us?
- A. Don't talk anything to others. B. Don't care about what others think.
C. You should share your feelings with others. D. You have to stay inside and think it over.
24. In the writer's opinion, what will friends do if you talk to them about your worries?

26. What's the main idea of the passage?
- A. We should be more private than before.
B. We should talk to friends about how we feel.
C. We shouldn't laugh at our friends.
D. Everybody feels upset sometimes.

How many of us could go a week without(不用) our phones? I can't even remember the last time I went a day without the Internet. Technology(科技) makes our life easier. However, we have to face the fact: Technology makes us lazy.

In the past, when we wanted to do something relaxing, we got dressed and drove to the movies or went out to have fun with friends. Now we don't need to go out. __▲__ We just sit on the sofa and turn on the computer. Then we can have much fun.

We find the answer to anything with Baidu. When we have a problem, we usually try to find out the answer online. Many of us don't try to read books or ask for help to work out the problem.

I get the feeling that we're getting closer and closer to the day when people won't even be able to read paper maps. Many young people have no idea how to find a place in their own cities without using a BDS.

How can we **detach from** too much technology? Using technology becomes one of our habits and we can never stop using it. What we can do is to start doing things more without technology.

We have to learn how to enjoy our free time without it. Although it's not easy, we can start from small things. For example, turn off phones and computers from time to time and check(检查) e-mails and QQ or WeChat only once or twice a day. We can also do something interesting without using technology, like playing sports and walking a dog.

27. Which can be put into “__▲__”?

29. The underlined words “**detach from**” have the closest meaning to _____.
- A. hear from
B. learn from
C. break away from
D. be different from
30. What's the passage mainly about?
